#### He Begins Tour In Venezuela, Explains Synod

By Don A. Schanche Los Angeles Times Service

Coum for legals inversity bear CARACAS - Pope John Paul II has begun his sixth visit to Latin America with a condemnation of radical elements of liberation theology and an explanation of his Sunstally proper mexpected call for an extraordi-5 1550 Cialed with the nary synod of bishops.

mber 1933 and tion of the Second Variean Countries as he mber 1933 Alpar cil," the pope told reporters as he call the to Caracas.

To critics of his conservative philosophy who feared that the purpose of the synod might be to limit some of the reforms drawn up 20 years ago by the council — or Vatican II, as it often is called — John Paul scoffed that "people looking backward don't see progress."

Cardinal Agostino Casaroli, the

Vatican secretary of state, said that the pope firmly supports the decisions of Vatican II and did not seek to alter the reforms. In his remarks the purpose of the synod would be "to hold the line, the orientation of the council.

"I am convinced that, through

the council, the Holy Spirit spoke

to us," John Paul said.
In a speech to Venezuelan bishops at the Apostolic Palace in Caracas, the leader of the world's 795 million Roman Catholics plunged directly into one of the most burning of church issues.

He admonished the bishops to

discipline what he called "erring" priests who "disfigure the gospel ideologies and political strategies ed Ad Quickly sate in search of an illusory earthly liberation '

His reference was to specialists in the "theology of liberation," leaders of a movement in the church - particularly in the Third World — who have been cautioned don paper, the Mail on Sunday.

by the Vatican against allowing Mc. Mandela had been allowed to who have been cautioned Marxist concepts and modes of thought to "corrupt" the social and the church.

The pope sternly exhorted the bishops to be vigilant "in order to forced to advocate it by the policies creeks remove from the flock the errors of the white government, and of a that threaten it - a delicate duty, which requires a special pastoral tact, both in order to win over the errant and to prevent the faith of the community from being dam-

John Paul added that "unfortunately there are not lacking those who, abusing the mission to teach what they received from the see = church, proclaim not the truth of Christ but their own theories, at times in open contrast to the magis-

ut terium of the church." He asked the bishops to firmly correct those priests and theologians who, he believes, have strayed from "correct doctrine," and to : above all, impede he who abuses

#### Reagan Hopes V-E Ceremonies Will Avoid Hate

WASHINGTON - President Ronald Reagan says he hopes that celebrations remembering the end of World War II will not be "recalling all of the hatred" of the era.

Mr. Reagan also said Saturday that after attending a May 2-4 economic summit meeting of Western nations in Bonn, he would stay over for "a couple of days" on a state visit to West

But the White House spokes-man, Larry Speakes, said the trip may not extend to May 8, the anniversary of V-E Day victory in Europe over the Germans in 1945.

Mr. Reagan said his state visit "will be close enough to the time that, I think, that if there's any observance it would be there and with our hosts, the

# U.S., Soviet Will Resume Weapons Talks March 12

By David Hoffman

WASHINGTON - The United States and the Soviet Union have announced that negotiations on

March 12 in Geneva. President Ronald Reagan said Saturday he would seek an agree-ment on arms reductions during his second term but that the effort

might take longer than four years. "I wouldn't try to confine it to four years, because I know how long negotiations have taken with them," Mr. Reagan said in a White House interview with radio corre-

The three-tiered negotiations are to deal with long-range missiles, medium-range missiles and space weapons. Talks on both categories of missiles were suspended in 1983 after the NATO deployment of U.S.-built Pershing-2 and cruise missiles in Western Europe.

The space weapons talks are a new category of talks. The Russians want to block Mr. Reagan's space-based missile defense system, now in the research stage. Mr. Reagan has said the nonnuclear missile defense, known as the Strategic Defense Initiative, eventually could make nuclear missiles "impotent and obsolete."

The announcement was made simultaneously by the White House and the Kremlin. The U.S. delegation, announced Jan. 18, will he headed by a Washington attorney, Max M. Kampelman, who will also represent the United States at the space arms talks.

The other negotiators will be former Senator John G. Tower of Texas on long-range missiles and a "Personally I am a Socialist and career diplomat, Maynard W. Glit-I believe in a classless society," Mr. man, on medium-range missiles Paul H. Nitze and retired General Edward L. Rowny, the former negotiator for long-range missile talks, will be advisers to Secretary of State George P. Shultz.

Officials also said Saturday that Mr. Kampelman's deputy in the talks on space weapons would be Henry F. Cooper, an official at the Arms Control and Disarmament

Agency.

The Soviet negotiating team will here he said he was subjected to be headed by Victor P. Karpov, who previously headed the Soviet psychological persecution, "the delegation to talks on curbing longrange missiles, worked on the walk in the woods" formula with Mr. Nitze that later was rejected by

> The third Soviet negotiator will be Alexei A. Obukhov, deputy chief of the U.S. desk at the Soviet Foreign Ministry, who took part in previous talks on long-range missiles.

After the announcement that negotiations will resume, Mr. Reagan was asked in the interview with seven radio correspondents whether he agreed with Mr. Nitze's assessment that prospects for an agreement were better than in the

past but not "very good."
Mr. Reagan said "I can understand that" because Mr. Nitze was a veteran of past negotiations in which the U.S. has "gone to the table and come away without anything that was of really any great importance."

"I, on the other hand, tend to be a little more optimistic, not euphoric," he said. "I, too, know how tough this is going to be. But at least it is the first time that I can recall the Soviet Union openly themselves saying that they wanted to see the number of weapons reduced and have even gone so far to say what we have said, that they would like to see the elimination of nuclear weapons entirely."

A White House official said that the two nations were going into the talks with differing views about "linkage" between each set of ne-

### Sunni Minister Resigns From Lebanese Cabinet

education minister and a former prime minister, submitted his resignation Saturday. He has been the main mediator between the sharply divided factions that make up President Amin Gemayel's coalition

Mr. Karami gave no date for the next cabinet meeting, which normally is held every Wednesday, the cabinet. He has held back, Lebastate radio said. Sunday's session was scheduled to discuss the currency depreciation and ways to salvage the economy.

Mr. Hoss met Saturday night with aides of Walid Jumblat, the Druze Moslem leader who holds the portfolios of tourism and public works in the cabinet.

A delegation including two of Mr. Jumblat's aides and an adviser to Mr. Hoss left Sunday for Da-

mascus to explain the resignation decision to Mr. Jumblat and Abdel Halim Khaddam, first vice presi-

York Times reported from Beirut: The resignation comes as the government faces two crises: the imminent collapse of the once-resilient Lebanese economy and the beginning of the Israeli withdrawal from southern Lebanon. Mr. Hoss, an economist who

served as prime minister from 1976 to 1978, has spoken privately in recent weeks of his increasing frustration and his desire to leave the nese sources said, only at the insistence of Lebanon's chief Sunni religious leader, or grand musti, Sheikh Hassan Khaled. On Sept. 5, Mr. Hoss narrowly

escaped death when a car bomb exploded as he arrived to escort Sheikh Khaled to a religious cere-

He was described by political sources as "fed up" and in "total dismay" over the inability of Mr. Karami's nine-month-old government to accomplish anything sig-

Mr. Hoss had become convinced, these sources said, that President Gemeval, a Maronite Catholic, was not making an effort at revisions in the system by which political power is apportioned among religious sects, with the edge held by the Christians.

Changes were vaguely agreed to in principle at meetings of the fac-tional leaders in Switzerland last winter. In September, a weeklong session of the cabinet, described then as the 'last chance for Lebanon," was held in Mr. Gemeyal's hometown of Bikiaya. A large committee was named to draw up changes, but it has never met.

In addition, associates say, Mr. Hoss has become increasingly upset over the continuing anarchy in West Beirut and over the collapse

of the economy. On Friday, Lebanese bankers took the unusual step of stopping trading in foreign currency for two hours to halt the deterioration of the Lebanese pound, which hit a record low of 13 to the U.S. dollar. It was six to the dollar in June.

Mr. Lomeiko replied: "The Soviet Union does not negotiate with individuals. We will take as our starting point the position of the United States as our partner in the talks, and not the expressed opinion of individual members of the

negotiators, unlike their counterparts, had experience in arms negotiations. Also, unlike the Amerikilled and wounded in recent cans, all three Russians are the current system in which the believed to speak the language of rich are taxed at a higher rate than their opposite numbers.

### WORLD BRIEFS

3083

U.S., Canada Plan New Radar Defense WASHINGTON (NYT) - The United States and Canada are near agreement on a \$1.2-billion project to modernize an arctic network of radar stations for the defense of North America against a Soviet attack, according to officials of both countries.

according to officials of both countries.

U.S. Air Force officials said Thursday that the present system, known as the Distant Early Warning, or DEW, line, had fallen into disrepair since it was built in the mid-1950s and now could be penetrated by bombers or cruise missiles. The DEW line was built to defend against bombers as part of a system that included interceptor planes, surface-to-tic missiles and a force of 200 000 men.

air missiles and a force of 200,000 men. DEW included 31 radars stretching 3,000 miles (4,848 kilometers) across Alaska. Canada and Greenland, transmitting signals to the North American Aerospace Defense Command. The new project, according to Pentagon officials, would call for an electronic fence of 39 long-range radars and 35 short-range radars, to be called the North Warning line. The project would be completed in 1992.

#### Greens Party Dissolves Berlin Branch

FREIBURG, West Germany (Reuters) — West Germany's radical Greens party has announced that it has dissolved its branch in West Berlin because it had been infiltrated by neo-Nazi elements.

A spokesman said Saturday that the decision was made in Freiburg by the party's ruling committee at the recommendation of its federal executive. The decision meant that the branch, which has about 100 registered members, would be unable to oppose the majority view in the party and contest West Berlin's city elections on March 10.

#### U.S. Navy Weapons Experts in China

would discuss in detail such items as gas turbine engines, sonars, guns and torpedoes, which Pentagon officials say China has agreed in principle to

#### Chernenko Works Published in Book

MOSCOW (UPI) - A book of speeches and articles by President Konstantin U. Chernenko, who has not been seen in public for a month and reportedly is seriously ill, was published Sunday in Paris.

The official Soviet news agency Tass said that the book's forward was

written in November, before Mr. Chernenko, 73, fell ill. In it, the Soviet leader warned that the deployment of U.S. missiles was tipping the balance of power in Europe and he urged an end to competition in

### Israel, Egypt Resume Talks on Border BEERSHEBA, Israel (UPI) — Israel and Egypt agreed Sunday to

propose "new ideas" for resolving their dispute over the border area of Taba, a narrow stretch of territory on the Gulf of Aqaba.

The first day of the negotiations, which U.S. representatives are observing, was cut short to allow the sides to come up with new proposals for the deployment of a multinational force in Taba, Israeli sources said. The sources said that Israel and Egypt would present "new ideas" on Monday, the second of three days of scheduled talks. The talks were the first on the area since March 1983.

#### Sunni Radicals Get Amnesty in Syria

DAMASCUS (AP) - President Hafez al-Assad has declared an amnesty for some members of the outlawed Moslem Brotherhood organization imprisoned in Syria, and has invited those in exile to return to the

country, state-controlled newspapers reported.

The report, published by Syria's three main newspapers, Al-Baath, Al-Thawra and Tishrin, said that Mr. Assad's decision followed contacts between Syrian officials and Moslem Brotherhood leaders abroad. The Moslem Brotherhood, an underground group of fundamentalist Sunni Moslems, opposed Mr. Assad, who, like the top members of his adminis-

1011 (3) 1116

ration, is of the Alawite Moslem minority, The Moslem Brotherhood had been accused of plotting to overthrow Mr. Assad and was held responsible for scores of assassinations and fatal bomb blasts in the past decade. The group was weakened in 1982 after the Syrian Army destroyed its power base in the northern city of Hama. Thousands were reported killed or wounded during that campaign, which virtually leveled the city of 170,000 people.

#### For the Record

Pakistan wants to postpone the fourth round of Afghan peace talks, sponsored in Geneva by the United Nations, until early April because of Pakistani elections next month, the official APP news agency reported. The last round of talks, aimed at a withdrawal of Soviet troops from Afghanistan, was held in August and the next was due in February.

The United States will supply Iraq with 45 jet fighters, mobile surface-to-air missile systems and radar networks, a Kuwaiti newspaper said Sunday. The radical Al Watan newspaper in Kuwait said the sales agreement was signed last November during a visit to Washington by

#### In Soviet, Name Of Khrushchev Is Still a Taboo

Washington Post Service MOSCOW - The Soviet authorities have resorted to censorship to erase from a documentary film the footage showing Nikita S. Khrushchev, the former Soviet Communist

Party leader, who died in 1971. The action involved a joint Soviet-Indian production of a documentary about Jawaharial Nehru, India's first prime minister. The Indian version of the film shows Khrushchev meeting and conferring with Nehru and also includes long scenes of Khrushchev's triumphal tour of India, Soviet censors, however, eliminated Khrushchev from the hour-long segment of the film shown Friday night.

However, Marshal Nikolai A. Bulganin, who served as Soviet prime minister under Khrushehev and who was subsequently disgraced for alleged "anti-party" activities, made his first appearance on Soviet television screens in more than a

Political observers here noted that the decision to eliminate Khrushchev from the film reflects continued concern here about the man who was forced out of the Kremlin in 1964.

It remains a mystery why Soviet censors continue to eliminate Khrushchev from all films and publications while finding a member of the "anti-party group and China's much reviled Mao acceptable for wide audi-

"Hail to the Chief," which has been used to herald the ceremonial arrival of U.S. presidents since the inauguration of James K. Polk in 1845, once again led the hit parade during the festivities last week in Washington.

The song, with a sprightly tune by James Sanderson set to words taken from "The Lady of the Lake," written by Sir Walter Scott in 1810, was first per-formed in 1812 in Britain. In the United States, it became a song with which to greet politicians and, eventually, presidents. Since the words are not well-known, The New York Times reprinted them as a service to its readers:

Hall to the chief who in trimph advances. Honored and bless'd be the evergreen pine.

Long may the tree in his banner that glances Flourish the shelter and grace The state of the s

The Times did not attempt to explain the words.

#### They Also Served, Who Stand and Wait?

The second Representative Patricia Schroeder, Democrat of Colorado, said in a recent speech, There are three things the Democratic Party must do if it wants to win the White House? Unfortunately, no one knows what they are."

Mrs. Schroeder also said that the new term for the evolving U.S. economic scene, "the service economy," must have been coined by "someone who has not been in a gas station lately or tried to get waited on in a department store."

#### Short Takes

Governor Richard D. Lamm of Colorado, a Democrat, has reluctantly signed a constitutional amendment that forbids the use of state funds for abortions. Declaring that the measure creates one standard for those who can afford an abortion and one for those who cannot, Mr. Lamm said, "We shall start the insane public policy of forcing pregnant welfare mothers to have unwanted children."

### **Union Carbide Says It** Acted on Safety Report

By Franklin Whitehouse

New York Times Service
DANBURY, Connecticut — Union Carbide Corp. gave "immediate attention" to an internal safety report warning of a possible "runaway reaction" in a tank storing a toxic chemical in West Virginia, according to a company official.

The official, Jackson B. Browning vice president for health, safety and environmental affairs, said Friday that "a simple change in operating procedures completely eliminated the concern" raised Sept. 11 in the report by Union

Carbide's safety inspectors.

In any case, Mr. Browning said, the inspectors had found the threat "in no way imminent" but had raised the concern as a "hypotheti-

cal scenario. The tank at the plant in Institute, West Virginia, contained methyl isocyanate, the chemical that leaked from a Union Carbide plant in Bhopal, India, on Dec. 3, killing more than 2,000 people and injur-

ing thousands more.

Mr. Browning said the safety report on the West Virginia plant was not sent to India. "There was no reason to share"

the report with managers of the Bhopal plant, Mr. Browning said, because different devices were used to cool the tanks at the two facili-

That assertion was later disputed by a spokesman for Representative Henry A. Waxman, a California Democrat who made the safety report public on Thursday.

According to Mr. Waxman's spokesman, Union Carbide told the House Subcommittee on Health and the Environment, which Mr. Waxman heads, that the two plants had the same designs

# Search for Security: The Case for the Strategic Defense Initiative

Zbigniew Brzezinski, professor of government at Columbia University and senior adviser at the Center for Strategic and International Studies at Georgetown University, was national security adviser under President Jummy Carter. Robert Jastrow, a physicist and professor of earth sciences at Dartmouth, is the founder of the Goddard Institute for Space Studies. Max M. Kampelman, a Washington lawyer, was ambassador to the Conference on Security and Cooperation in Europe under Presidents Carter and Ronald Reagan and has been named to head the U.S. delegation to the new arms control talks with the Soviet Union. In a reaction to this article in The New York Times Magazine, Tass, the Soviet press agency, charac-terized Mr. Kampelman as a hard-liner on U.S.-Soviet relations who would treat the negotiations "skeptically." Each author contributed individual sections to this article, which they edited and

#### By Zbigniew Brzezinski, Robert Jastrow, and Max M. Kampelman

EW YORK — Faith moves mountains. When it is in eternal religious values, faith is an indispensable strength of the human spirit. When it is directed toward political choices, it is often an excuse for an analytic paralysis.

Regrettably, our national debate over President Ronald Reagan's suggestion that the country develop a strategic defense against a Soviet nuclear attack is taking on a theological dimension that has no place in a realistic search for a path out of the world's dilemma. The idea of basing our security on the ability to defend ourselves deserves serious consideration. Certainly, the role of strategic defense was a major issue in the recent dialogue in Geneva between Secretary of State George P. Shultz and Foreign Minister Andrei A. Gromyko of Russia on new arms control negotiations.

For many years, our search for security has been restricted to designing offensive weapons to deter aggression through fear of reprisals. We must not abandon nuclear deterrence until we are convinced that a better means is at hand. But we cannot deny that, for both the Soviet Union and the United States, the costs, insecurities and tensions surrounding this search for newer, more effective and more accurate nuclear missiles produce a profound unease that in itself undermines stability

The conventional view is that stability in the nuclear age is based on two contradictory pur-suits: the acquisition of increasingly efficient nuclear weapons and the negotiation of limits and reductions in such weapons. The United States is diligently pursuing both objectives, but the complexity of arriving at effectual arms control agreements is becoming apparent as more precise and mobile weapons, with multiple warheads, appear on both sides. Unlike ours, moreover, many Soviet missile silos are reloadable, and thus the number of silos does not indicate the number of missiles, further complicating verification.

TE must never ignore the reality that the overwhelming majority of the Soviet strategic forces is composed of primarily first-strike weaponry. And given the large numbers of first-strike Soviet SS-17, -18 and -19 land-based missiles. American leader can make decisions about seet first strike can become a practical option.

The Russians could strike us first by firing the reloadable portion of their nuclear arsenal at our missiles, the Strategic Air Command and nuclear submarine bases, and if the surviving U.S. forces, essentially nuclear submarines, were to respond, the Russians could immediately counter by attacking our cities with missiles from nonreloadable silos and, a few hours later. with whatever of their first-strike reloadable weapons had survived our counterattack. They are set up for launching three salvos to our one.

To us, this catastrophic exchange is unthinkable. But, with the strong probability that the U.S. response would be badly crippled at the outset by a Soviet strike, some Russian leader could someday well consider such a potential cost bearable in the light of the resulting "victory." Furthermore, such an analysis might well anticipate that an American president, knowing that a strike against our cities would inevitably follow our response to a Soviet first strike, might choose to avoid such a catastrophe by making important political concessions. No responsible U.S. president can permit this country to have to live under such a threat, not to speak of the hypothetical danger of having to choose either Soviet leadership. But their very importance to annihilation or submission to nuclear black- us illustrates the difficulty of a point defense. mail. Hence the understandable and continual drive for more effective offensive missiles to provide greater deterrence.

The result is that weapons technology is shaping an increasingly precarious U.S.-Soviet strategic relationship. For this reason, we urge serious consideration be given to whether some form of Strategic Defense Initiative (SDI) might not be stabilizing, enhancing to deterrence and even helpful to arms control. To that end, we plish. address the major issues in strategic defense from three points of view:

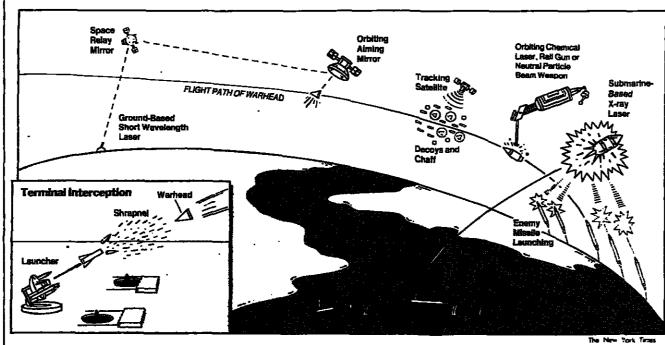

(1) The technical: Is a defense against missiles technically and budgetarily feasible?
(2) The strategic: is a defense against missiles strategically desirable? Does it enhance or diminish stability? Does it enhance or diminish the prospects for arms control and a nuclear-

weapons build-down?
(3) The political: What are the political implications of strategic defense for our own country and for our relations with our allies? What are the implications for the larger dimensions of our relationship with the Soviet Union? How do we seek the needed domestic consensus on a viable

great deal has been written about the state of missile-defense technology. \_Some experts say the technology sought is unattainable, others that it is merely unattainable in this generation. Yet the promise of the Strategic Defense Initiative is real. Some of the technologies are mature and unexotic. Their deployment around the end of this decade would involve mainly engineering development. Technically, these vital defenses could be in place at this moment were it not for the constraints accepted by the United States in its adherence to the anti-ballistic missile treaty of

With development and some additional research, we can now construct and deploy a twolayer or double-screen defense, which can be in place by the early 1990s at a cost we estimate to be somewhere in the neighborhood of \$60 billion. A conservative estimate of the effectiveness of each layer would be 70 percent. The combined effectiveness of the two layers would be over 90 percent: Less than one Soviet warhead in 10 would reach its target - more than sufficient to discourage Soviet leaders from any

thought of achieving a successful first strike. The first layer in the two-layer defense system

#### A Space-Based Defense System: How It Would Work

Proposals for a space-based missiledefense system are in an early phase of research. Several possibilities are illustrated above. Ground-based lasers, probably the easiest system to maintain and defend, would rely on satellite-mounted relay mirrors to guide their beams over the horizon. But the tracking of warheads by satellite could be complicated by

platforms orbiting over the Soviet Union. Be-

cause they are weightless in orbit, such plat-

forms could be protected against attack by

After the booster has burned out and fallen

away, the warheads are through space on their way to the United States. The second layer of

the defense — the terminal defense — comes

into play as the warheads descend. Interception

would be at considerable altitude, above the

atmosphere if possible. This second phase re-

quires further engineering, already under way,

makes it difficult to discriminate between real

warheads and decoys. In the interim, intercep-

differences in air drag separate warheads from decoys. In either event, destruction of the war-

Of the two layers in the defense, the boost

phase is by far the most important. It would

prevent the Russians from concentrating their

national-command authority (the chain of com-

mand, beginning with the president, for order-

ing a nuclear strike), key intercontinental ballis-

tic missile silos or the Trident submarine pens.

because they could not predict which booster

and which warheads would escape destruction

restore much of the credibility of our land-based

deterrent, now compromised by 6,000 Soviet

ICBM warheads. It is particularly necessary to

protect the 550 silos containing our Minuteman-

3 ICBMs, of which 300 have the highly precise

Mark-12A warheads. These are the only missiles

in the possession of the United States with the

combination of yield and accuracy required to

destroy hardened Soviet military sites and the

1,500 hardened bunkers that would shelter the

because the value of the silos to us means they will be among the highest priority targets in any Soviet first strike. The Russians can overwhelm

any point defense we place around those silos, if

they wish to do so, by allocating large numbers of warheads to these critical targets. But if we

include a boost-phase defense to destroy their

warheads at the time of firing, their objective

becomes enormously more difficult to accom-

The boost-phase defense has still another

advantage. It could effectively contend with the

menace of the Soviet SS-18s, monster missiles twice the size of the 97.5-ton MX. Each SS-18

carries 10 warheads, but probably could be

loaded with up to 30. The Russians could thus

add thousands of ICBM warheads to their arse-

nal at relatively modest cost. With numbers like that, the costs favor the Russians. But a boost-

phase defense can eliminate all a missile's war-

heads at one time — an effective response to the

The likely technology for an early use of the boost-phase defense would use "smart" nonnu-

clear projectiles that home in on the target, using radar or heat waves, and destroy it on impact. The technology is close at hand and need not wait for the availability of the more

devastating but less manure technologies of the laser, the neutral particle beam or the electro-magnetic rail gun. The interceptor rocket for

this early boost-phase defense could be derived

from air-defense interceptors that will soon be available, or the technology of anti-satellite mis-

siles (ASAT) launched from F-15 aircraft. These

rockets could weigh about 500 pounds (226

kilograms), the nonnuclear supersonic projec-

tracking information needed to aim the rockets would also be acquired from satellites

orbiting over the Soviet missile fields. The so-

warheads on such high priority targets as the

cause interception above the atmosphere

heavy armor, onboard weapons and maneuver-

such countermeasures as the deployment of decoys and radar-confusing chaff. Such nonnuclear weapons as chemical lasers, rail guns or neutral particle beams would be placed in orbit to respond to enemy attack. They would have to be deployed in large numbers, but highly polished coatings on enemy warheads might deflect much of

their power. X-ray lasers would be triggered by nuclear explosion after being launched from submarines. for example; each laser could damage dozens of missiles. Terminal interceptions would be designed to block whatever warheads made their way through the screen. A projectile or cloud of shrapuel would be guided to destroy the incoming warhead.

er," carrying multiple warheads rises above the ties for ground-control communications and atmosphere at the beginning of its trajectory. This boost-phase defense, based on interception The technology used for the terminal defense and destruction by nonnuclear projectiles, could be a small, nonnuclear homing intercepwould depend on satellites for the surveillance of the Soviet missile field and the tracking of missiles as they rose from their silos. These

tor with a heat-seeking sensor, which would be launched by a rocket weighing one to two tons and costing a few million dollars each. Intercepoperations could only be carried out from space tion would take place above the atmosphere, if possible, to give wider "area" protection to the terrain below. These heat-seeking interceptors can be available for deployment in about five years if a decision is reached to follow that course. One concept for this technology was tested successfully in June by the Defense Department, when an intercepting missile zeroed in on an oncoming warhead at an altitude of 100 miles (160 kilometers) and destroyed it.

The technology for a terminal defense within

the atmosphere would be somewhat different, but would probably also depend on heat-seek-ing missiles. The cost of this terminal layer of defense would be about \$15 billion and include \$10 billion for 5,000 interceptors, plus \$5 billion for 10 aircraft carrying instruments for tracking

tion can take place in the atmosphere, where of the Soviet warheads.
The estimated \$60 billion for this two-layer defense is a ball-park figure, of course. Howevheads would take place at sufficiently high alti-tudes, above 100,000 feet (30,500 meters), so er, even with its uncertainties, it is surely an affordable outlay for protecting our country that there would be no ground damage from warheads designed to explode when approached from a nuclear first strike.

O be sure, the above is not an attractive option to those who place all their eggs in the arms control basket and underestimate the immense difficulty of attaining an effective and truly verifiable pact. It is also not appealing to those wedded to the idea that it is best to assure survival by simply maintaining the perilous balance of terror between the United States and the Soviet Union. We favor energetically pursuing arms control negotiations and seeking to achieve credible deterrence, but these options by themselves are unfortunately not as likely to provide a more secure future as the alternative strategy of mutual security combining defense against missiles with retaliatory

The simplest and most appealing option, quite naturally, is comprehensive arms control. Large reductions in both launchers and warheads, as well as effective restrictions on surreptitious deployment or qualitative improvements, would enhance nuclear stability and produce greater mutual confidence. It would, if properly negotiated and effectively monitored, enhance mutual survival.

How likely is such a future? Some progress in arms control is probably possible, but genuinely effective arms control would require that: (1) there be a restraint imposed on qualitative weapons enhancement; (2) mobile systems, relatively easy to deploy secretly, be subject to some form of direct verification; (3) a method be devised for distinguishing nuclear-armed and nonnuclear cruise missiles; and (4) monitoring arrangements be devised for preventing surreptitious development, testing and deployment of new systems. So far, the Soviet record of compliance with the SALT-1 and SALT-2 accords is sufficiently troubling to warrant skepticism regarding the likelihood of implementing any such complex and far-reaching agreement.

Moreover, such an agreement would have to recognize that it is no longer possible to limit space-based systems without imposing a simultaneous limit, along the above lines, on terrestrially deployed systems, which present the greater threat to survival. After all, the space-based defenses include no weapons of mass destruction and no nuclear weapons. And it should be some cause for concern to note the Soviet insistence on prohibiting space-based defensive sys-tems, the only method now available to inhibit the first-strike use of land-based Soviet offen-

inally, a comprehensive and genuinely verifiable agreement, limiting both qualitatively and quantitatively the respective strategic forces, on earth and in space, will require a much more felicitous political climate than currently exists. Negotiations may lead to such improvement, but in the setting of intense and profound geopolitical rivalry, how realistic is it to expect in the near future accommodation sufficient to generate the political will essential for a genuine breakthrough in arms control negotiations? The mere mentions of Afghanistan, Nicaragua, Sakharov and Soviet violations pods on satellites and fired from space. The of the humanitarian provisions of the Helsinki Final Act dramatize the depths of the problem. There may be no direct negotiating linkage orbiting over the Soviet missile fields. The so-called space weapons of strategic defense are between these acts of Soviet misconduct and arms control, but their political interaction is indispensable for the crucial boost-phase de- evident.

This is why there is currently such an emphasis on maintaining peace via the doctrine of We estimate that the cost of establishing such deterrence based on mutual assured destruction, a boost-phase defense by the early 1990s would called MAD. But what does this mean in an age be roughly \$45 billion. That price tag includes when weapons are becoming incredibly precise, 100 satellites, each holding 150 interceptors, mobile and difficult to count? In the absence of sufficient to counter a mass Soviet attack from a miraculous breakthrough in arms control, the their 1,400 siles, plus four geosynchronous sat- only possible protection within the framework — the "boost-phase" defense — would go into effect as a Soviet first-strike missile, or "boost-surveillance and tracking, plus the cost of facili-offensive systems. This is in part what we are

doing. But how many of such systems will be needed in the likely conditions of the next decade? If Soviet strategic forces continue to grow both quantitatively and qualitatively, our country will have to deploy, at enormous cost, probably no fewer than 1,500 to 2,000 mobile Midgetmen to preserve deterrence. How will they be deployed? Where? And at what cost? And will the Soviet Union and the United States be more or less secure with the deployment of such precise weaponry capable of effective pre-emption? The Soviet answer is clear: The Russians are busy enhancing the survivability of their leadership and of their key facilities by hardening dispersal and deception.
This second traditional alternative, mutual

assured destruction, cannot be an acceptable. long-run option, although it is a necessary policy in the absence of an alternative, given the dynamics of weapons technology. Thus, a new third option, the Strategy of Mutual Security. must be explored as preferable. The combination of defense against space missiles with retaliatory offense in reserve enhances deterrence.

such a strategic defense. The deployment of the systems described above would not give us abso-Russians know we are not deploying first-strike counterforce systems in sufficient numbers to make a first strike by us feasible. In any case. one can be quite certain that the Russians will also be moving to acquire an enhanced strategic defense, even if they do not accept President Reagan's offer to share ours. Indeed, they are doing so now and have been for some time.

tically possible to scale down our offen-States and eventually of the Soviet Union, into a Geneva negotiations. genuinely defensive posture, with neither side posing a first-strike threat to the other, would end, and the stalemate has reflected an impasse tential gains in our security must be pursued, in

nical feasibility. The current debate over President Reagan's initiative for a strategic defense program suffers from that conflict among scientists. It is important to clarify this issue.

We can begin a two-tiered strategic defense that would protect command structure as well as our missiles and silos and thus discourage any thoughts by the Soviet military that a first-strike effort would be effective. Some within the scientific community minimize the importance of this technical feasibility and emphasize instead the view that it is scientifically impossible today to provide a strategic defense that will protect our cities. Such a broad defense of populations is today not feasible, but it is prudent for our society to keep in mind the rising tide of technical and scientific advances so rapidly overwhelming the 20th century.

The "impossible" is a concept we should use with great hesitation. It is foolbardy to predict the timing of innovations. We are persuaded that the laws of physics do not in any way prevent the technical requirements of a defensive shield that would protect populations as well as weapons. A total shield should remain our ultimate objective, but there is every reason for us to explore transitional defenses, particularly because the one we have discussed would serve to deter the dangers of a first strike. Defenses against ballistic missiles can be effective without being "perfect," and the technology for this is nearly in hand.

OCIETY must also not forget that ever since the beginning of the scientific age, the organized scientific community has not had a particularly good record of predicting developments that were not part of the common wisdom of the day. In 1926, for example, A. W. Bickerton, a British scientist, said it was scientifically impossible to send a rocket to the moon. In the weapons field, a U.S. admiral, William D. Leahy, told President Harry S. Truman in 1945: that he rejected the talk "about a 3,000-mile rocket shot from one continent to the other Soviet conventional military force. carrying an atomic bomb ... and we can leave that out of our thinking." In the strategic area, as late as 1965, the capable Secretary of Defense Robert S. McNamara wrote: "There is no indication that the Soviets are seeking to develop a strategic force as large as our own.

Our debate and our discussion, furthermore, must not ignore what the Russians, who have always understood the need for defenses, are to protect its missiles immeasurably strengthens doing in space. They have spent more on strate- our power to deter and thereby serves to protect gic defensive forces since the anti-ballistic mis- our allies. VEN if a perfect defense of our popula-tion should be impossible to achieve — and none of us can be certain of that the leaders of our government have a responsibility to seek defense alternatives designed to complicate and frustrate aggression by our adversaries. The very injection of doubt into their calculations strengthens the prospect of hesitation and deterrence. It may not be possible to destroy the world's ballistic missiles, but if we can return them to the status of a retaliatory deterrent rather than a pre-emptive strike we will have reduced the need for the existing large arsenal and thereby the threat of war.

The argument has been made that the SDI is olitically harmful because our North Atlantic Freaty Organization allies have not received the initiative with enthusiasm. Their skepticism is an understandable initial reaction. First of all our allies were taken by surprise by the president's March proposal of a Strategic Defense Initiative. At times, secret discussions are necessary, but doubtless allied cooperation will be forthcoming in direct proportion to timely and honest consultation. Furthermore, European political leaders feel under great pressure from an activist peace movement that emphasizes traditional arms control negotiations as a major objective. A new approach, which the Russians criticize as hostile, is, therefore, looked upon as troubling, regardless of its merit.

As to the substance of the initiative, coupling our national security interest with that of our allies is a foundation of NATO defense. Any tendency toward decoupling produces great concern on their part. Western European lead-"That [atomic] bomb will never go off, and I ers look upon all security proposals with that speak as an expert in explosives." And Dr. criterion in mind. chief of the agency.

The Taiwan official who described Mr. Liu's role as an agent said that Mr. Liu's last report was a handwritten memorandum, dated Oct. 1, 1984, discussing Chinese troop movements along the China-/ietnam border.

The official added that Mr. Liu's report was mailed from Redwood City, California, and signed with an alias, Liu Hsiang Chen.

Mr. Liu, an American citizen, was shot to death on Oct. 15 at his home in Daly City, California, a

suburb of San Francisco. "Two weeks before he was shot, he was still providing information to us," the Taiwan official said. In the Oct. I memorandum, the official added, Mr. Liu wrote of a

'division-size" offensive on April 20, 1984, by China against nese forces. The official also roduced photocopies of a report that he said was written by Mr. Liu and a deposit slip for a few thousand dollars, purportedly in payment for the information, from a San Francisco bank.

Another senior Taiwan official said the chief suspect in the murder. Mr. Chen, who is purported to be the head of the Bamboo Gang in Taiwan, a crime syndicate, will not be deported to the United States.

"He will be charged here," said James C.Y. Soong, a top government official. There is no extradition treaty between the United States and Taiwan. The two do not

have official diplomatic relations. Despite this, State Department officials expressed hope that Chen could be deported to stand trial in California. "Henry Liu is an Amer-ican citizen, murdered in the United States," an American official said. "We think justice ought to be

#### Prison Chief Says Aquino Suspects Can't Be Accepted

MANILA - The chief of the national penitentiary said Sunday that he had no room for 17 soldiers charged with killing an opposition leader, Benigno S. Aquino Jr. The announcement creates new pressure for them to be allowed to remain in military custody.

The Manila police chief said earlier that the city jail was too crowded to accommodate the soldiers while they await trial on charges of murdering Mr. Aquino and Ro-lando Galman, an alleged Communist also gunned down on Aug. 21,

On Wednesday, prosecutors charged the 17 soldiers as "principals" in the two murders and urged that they be held without bail. Since then, they have remained in their military barracks under guard despite a court order that they be

placed in a penitentiary. Of nine others charged as acces sories in the case, only the armed forces chief, General Fabian Ver, Major General Prospero A. Olivas and Hermilo Gosuico, a businessman, have surrendered to police. They were released on bail ranging from \$1,500 to \$2,000.

The military authorities have petitioned the special court that will try the case to set bail for the other officers and soldiers and let them remain in military custody until the trial begins Feb. 1.

### **UN Chief**, At Camp Near Cambodia. **Urges Talks**

KHAO-I-DANG, Thailand Javier Pérez de Cuéllar, the United Nations secretary-general, toured the Thai-Cambodian border Sunday after making a plea in Bangkok for negotiations between the Vietnamese-backed government in Phnom Penh and the Cambodian

rebels opposing it.

Amid tight security, the UN der was welcomed by thousands

of refugees here. Three artillery explosions were heard in the distance shortly before Mr. Pérez de Cuéllar arrived at Khao-I-Dang, eight miles (13 kilometers) from the border. He was to have visited two other areas nearer the Cambodian frontier, but Thai government sources said the visits were canceled for security reasons. The refugee camp in Khao-I-Dang has been swollen by the arrival of about 62,000 Cambodian refugees in recent weeks, during an unusually heavy dry-season offensive by Vietnamese troops against

the Cambodian guerrillas. Sporadic fighting had been re-ported Saturday at the Rithisen and Nong Chan camps in Cambo-dia, both formerly held by the non-Communist Khmer People's Na-

tional Liberation Front. The front said in a radio broadcast Saturday that a large Vietnamese force backed by tanks was preparing to attack its last camp. The broadcast said the Vietnamese were assembling about 5,000 troops and 40 Soviet-supplied tanks to attack Sanro Changan, which is reportedly defended by

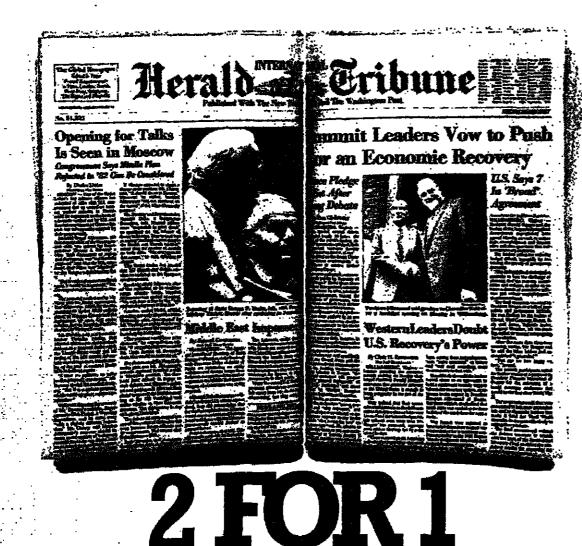

about 1,200 guerrillas. In Bangkok on Saturday, the secretary-general called for negotiations to end the "suffering, destruction and agony" that afflict Cambodia.

Mr. Pérez de Cuéllar, speaking at banquet at which Prime Minister Prem Tinsulanonda was host, thanked Thailand for welcoming about 600,000 refugees from Cambodia, Vietnam and Laos over the past decade.

In a related development Saturday, Foreign Minister Wu Xueqian of China said that Beijing would continue to support the Cambodian resistance forces, and had increased its assistance after the fall of the Ampil guerrilla camp.

Mr. Wu, who made the comments during a visit to Singapore, also urged the three main guerrilla factions - the liberation front, the Communist Khmer Rouge and the non-Communist guerrillas loyal to Prince Norodom Sihanouk — to form a tighter alliance.

#### How to Slim the Dollar

The dollar is now worth 70 percent more than in 1980. That is a mixed blessing, at best. It is good news for bargain-hunting Americans in London and Paris and for any American who buys foreign goods. It is a major factor in holding down inflation because American products must remain competitive. But there is a high cost for these benefits.

The lower prices abroad are drastically shrinking America's older industries. The "strong" dollar is causing American farmers to lose overseas customers. IBM, the titan of American exporters, complains that the rising dollar has depressed its computer profits. Only this currency gap keeps farmers and IBM from holding their own in world markets.

The Reagan administration has finally conceded that government ought to try intervening in money markets to slow down the run-up of the dollar. The administration's concern is welcome, but selling off more dollars cannot

address the underlying problem.
It is the federal budget deficit that has kept interest rates unusually high, thus adding to the dollar's allure as an investment. Not until U.S. government borrowing stops increasing can interest rates ease off enough to make foreign currencies more desirable. Otherwise

the clamor for protectionist measures against foreign goods will become unstoppable.

Through its first term the Reagan adminis-tration held that it could not and need not do anything about the dollar's high value. Not to worry, officials said; foreigners are buying dollars because America's vigor and stability make it the best place to invest.

No one believes government intervention alone can scotch the run-up. But when the dollar remained strong even as America's interest rates moved down, the administration had to show concern. Selling dollars and buying up weaker currencies can be at least a short-term palliative. It increases the supply of dollars and, at the same time, the demand for other currencies, thereby strengthening them.

Washington ought to work at attracting foreign investment, but by maintaining stability and opportunity, not by pumping up interest rates. Even further reductions in interest rates may not be enough; other governments also need to do more to revive their economies. But the Reagan administration's new willingness to enter the currency markets is first aid for a malady that cries out for surgery - most of all, deep cuts in the budget deficit

— THE NEW YORK TIMES.

#### **Terror Made in Taiwan**

It turns out that Taiwan, a country friendly to America, was involved in a savage act of terrorism on American soil. Its military intelligence bureau had a hand in gunning down a U.S. citizen, Henry Liu, a critic of the Nationalist Party, in front of his home in Daly City, a suburb of San Francisco, last Oct. 15. Suspicions of a Taiwanese hand had been voiced earlier but confirmation now comes from the Taiwan government. It has announced the bureau's involvement in the murder, has arrested three top officials of the bureau, including the chief, and is making two suspects described as members of the criminal "Bamboo Gang" - available to U.S. investigators.

Taiwan's involvement will surprise no one familiar with its intelligence activities in Amer-ica. These have included operations to gain military and political information and to influence the development of American policy and public opinion — operations more suitable to the style of a hostile power - and the surveillance of Taiwanese studying in America and of parts of the Chinese-American community.

These intrusions have provoked broad concern among Americans — but perhaps not broad enough. Taiwan's status as a friendly country, one especially admired by American conservatives, has perhaps inhibited the American reaction to some of its excesses. There

may also have been an unfortunate tendency to accept Taiwan's spying on "Chinese-Ameri-cans" as somehow its proper concern.

So why has Taiwan now come forward to disclose its own role in the Liu murder and to take some initial concrete steps against individuals? President Chiang Ching-kuo may understand that the secret police went too far and that it was necessary to cut Taiwan's losses before the case took on the dimensions of Chile's murder of emigre Orlando Letelier. Perhaps Mr. Chiang meant, belatedly, to accept a political requirement to assert authority over a rogue branch of the bureaucracy. Or he saw the wave of anger building in the United States, especially in the House of Representatives, where some members are discussing a halt to arms sales in retaliation for the murder.

A foreign government's assassination of an American citizen on American soil is a hostile act. Had the murder been committed by an avowed enemy of the United States, it would have provoked a national explosion. The Reagan administration is plainly embarrassed by the spectacle of a favored friend acting like a thug. Yet Taiwan must pursue its responsibil-"ies in this case to the end. It must also close out the pattern of intelligence operations that culminated in the murder of Henry Liu.

- THE WASHINGTON POST

### **An Opportunity for Seoul**

Reaching for a word to throw at the returning exile Kim Dae Jung, South Korea's ruling soldiers have resorted to an all-purpose oldie: "revolutionary." This is accurate in the sense that Jefferson, too, was a revolutionary. Mr. Kim agitates for free elections and civilian government — so strenuously that after a strong run for president in 1971 he was kidnapped from Japan, jailed and sentenced to death after a suspect military trial in 1980.

That sentence was soon commuted at U.S. request, to clear the way for General Chun Doo Hwan to become the first head of state to visit President Reagan. Now President Chun wants to come again, in April. But first he must deal with that vexatious revolutionary, who plans to return to Seoul next month. Mr. Kim's timing is doubly shrewd because National Assembly elections occur four days after he arrives, and the regime wants to make the most of allowing this limited plebiscite.

The obviously flustered military regime first vowed that Mr. Kim would be jailed at once, to serve out a 17-year sentence. On wiser second thought, it disavowed that threat as the "personal" utterance of the president's secretary

for political affairs. Now Seoul won't say what it will do, but denounces Mr. Kim for betraying his promise to avoid politics in American exile. Rashly outspoken, the populistic Mr. dom or a chance to lead the opposition.

Perhaps circumstance will give rise to wisdom. As host of the 1988 Summer Olympics, South Korea yearns to be recognized as a prosperous, stable and comparatively free society. On two counts the evidence is favorable, but liberty is severely rationed. Key parties are banned, opposition figures are forbidden political rights, the press is selectively censored. This is not gold medal behavior.

It may be unreasonable to expect a rapid transformation of South Korea's politics. But how refreshing if a ruling general there were revolutionary enough to greet Mr. Kim with Jeffersonian sentiments: "If there be any among us who wish to dissolve this Union or to change its republican form, let them stand undisturbed as monuments of the safety with which error of opinion may be tolerated where reason is left to combat it." And how unlikely.

- THE NEW YORK TIMES.

### Other Opinion

#### Pressure on Pretoria Can Help

The creation of a "forum" is not an impressive change [but] other reforms could genuinely improve the lot of many blacks. From now on, urban blacks will be able to own the land on which their houses stand. The brutal policy of forcibly removing blacks to the so-called homelands is to be reconsidered; influx controls on black migration from homelands are to be modified. These are real advances.

[President] Botha has not made these

changes out of philanthropy. They are a result mainly of the growing fear that the rioting in black townships during the past six months has engendered in government circles -- and of the increasing pressure from the West. The fact that even the right of the Republican Party in America is demanding changes in apartheid has clearly scared white South Africans. Economic pressure has played a part, too. It is clear that it is important to maintain pressure

to reform and eventually scrap apartheid. - The Sunday Times (London).

#### FROM OUR JAN. 28 PAGES, 75 AND 50 YEARS AGO

1910: 'Mail Subsidy' Battle to Begin WASHINGTON — Magazine publishers who are packing their grips to come to Washington to fight for the "mail subsidy," which makes the Government pay most of their postage, should wear their armor. They are going to run up against a solid formation. President W.H. Taft has pronounced it "little less than a subsidy." Postmaster General Hitchcock holds the loss to the Government in carrying maga-zines for a payment of one cent a pound but at a cost of more than nine cents to be responsible for the postal deficit. Congress feels strongly that the time has come for action to bring a more adequate return for the service which the Government performs. There is great activity among the publishers of magazines and peri-odicals. The scent of battle is already in the air.

1935: Upturn May Signal Recovery WASHINGTON - What is considered as concrete evidence that the United States is started on the road to recovery is seen in the survey issued [on Jan. 27] by the Federal Re-serve Board which shows that business activity in December reached the highest level for this month in five years. Not only does the report show that it was the best December since the depression, but indications are not lacking that further gains were made in January, which is taken as the most healthy indication of a definite upward trend which may well mark the first positive recovery step made since 1929. The report was hailed with enthusiasm in Administration circles as evidence that the recovery program with its huge spending is really beginning to take hold.

# The Living Reconciled in Respect for All the Dead

PARIS — The dispute over how the Western allies are to observe the 40th anniver-

sary of V-E Day is frivolous and unnecessary.
Washington, London, the other Western capitals and Bonn are uncomfortably at odds with one another over what exactly is to be celebrated, by whom, and how to go about it. The wartime allies fear upsetting the West Germans and lending indirect support to the Soviet campaign that presents the anniversary as a warning against alleged "revanchism" in West Germany. Germans see nothing to cele-brate in the partition of their country, one result of the allied victory. The people who were the victims of Nazi Germany see every reason to celebrate Nazism's defeat.

But no one in the West has any interest in celebrating a victory over Germany itself. The postwar German Federal Republic has been a formidable parliamentary democracy which

need make political apologies to no one.

Germans, nonetheless, are the legatees of their institutional past. The true achievement of the allied military victory in 1945 is that it was followed by two political victories: that of democracy in West Germany, and Western

Europe's postwar reconciliation. This war. unlike the first suicidal convulsion in Europe-an civilization, in 1914-1918, has been followed by real peace in Europe, reconstruction and the uniting of the West European states. The bad outcome of the defeat of Nazi Germany was establishment of Soviet power over Eastern Europe. There is nothing to celebrate in that. Germany, however, bears ultimate responsibility, having attacked the U.S.S.R. and created the conditions in which it was to choose to seek postwar security in the domination of half of Germany and of everyone whose misfortune it is to live be-

tween the German and Russian frontiers. That they should have done so is comprehensible, although a folly for which Russians—among others—will eventually pay. That however, is another subject. It was the Russians sian people who suffered most to overcome Nazi Germany. Had it not been for them the Nazi regime might not have been defeated.

Also true, and willfully neglected in Moscow, is that the Soviet Union probably would

not have survived without the Western allies. Had Hitler not had to light on a second front in North Africa and Italy during 1942 and 1943, and then in 1944 to prepare to deal with the allied invasion of Western Europe, Russia might never have been able to turn the tide of the war in the East. By 1945 Russia had also received from the West more than 400,000 vehicles and tanks, 15,000 aircraft, oil and industrial supplies, and enough food to have supplied every Russian soldier with some-

thing like half a pound of nourishment daily. What needs to be celebrated this year is that Britain, France, the Netherlands, Belgium, Greece, Norway, Denmark, the United States and Canada are reconciled with the Germans. What is to be regretted is that the Russians are not. In the West there has been a victory of humane values, of civilization.

But might we not, in May, try to do something large? Instead of celebrating military victory, might there not be a celebration of the reconciliation of those who 40 years ago were enemies, and of regard for the dead

all of the dead? The Soviet Union and its allies could be asked to take part in this.

Reconciliation is open to them. Why not hold such a ceremony — including Germans, the Western allies and delegations from the East, if they would come - in Germany, perhaps in Berlin, possibly at the foot of the blasted tower of the Kaiser Wil-

helm Memorial Church, that stark remnant and reminder of the final battle of the war?

Why not, instead of speeches, recall the dead, pray for them - and for those still trapped by the hatreds engendered in the war? Then, perhaps, those assembled might reflectively listen to something from the immense German contribution to civilization. Bach's "St. Matthew's Passion," Beethoven's Ninth Sypmphony and the Mozart "Requi-em" spring to mind. Or possibly one of the final Beethoven quartets — since modesty on such an occasion would be appropriate.

The purpose would be modest: to say that the past is past, and to assert that the future will be secure only if reconciliation endures. It would suggest that vengeance is empty. tional Herald Tribune. All rights reserved.

### **Either Fight Terrorism** Or Get Out of Lebanon

By Daniel Pipes

N EWPORT, Rhode Island — The Lebanese groups that have attacked Americans in the last two years have repeatedly made clear an intention to eliminate the American presence from Lebanon. The American reaction has been to disbelieve them. This is a serious mistake that has cost many lives and, unless re-paired, promises to cost many more.

Americans must recognize that the terrorists mean just what they say and must face up to the stark choice that this poses. Appeasing the terror-ists would mean withdrawing every American from Lebanon. Deciding to stay, however, would commit the United States to use all means necessary, including costly and unpleasant ones, to protect American citizens and interests in Lebanon.

Consider the sequence of events: In 1983 the United States Embassy in Beirut and the U.S. Marine Corps barracks were bombed.

In the first 10 months of 1984 the president of the American University in Beirut was assassinated, the U.S. Embassy was bombed a second time and three Americans — a missionary. a television correspondent and a dip-

lomat — were kidnapped.

In November 1984 a Shiite group linked to some of these attacks threatened to continue the violence. "We the Islamic Jihad organization, warn ... that we shall blow up all American interests in Beirut and any part of Lebanon . . . We address this goal makes it seem implausible.

warning to every American individual residing in Lebanon.

In the next two months, a librarian was abducted and two Americans were tortured and killed by Lebanese Shiites in a hijacked plane. The U.S. Embassy in Rome would have been bombed but for superb police work. Finally, an American priest, the Reverend Lawrence Martin Jenco, was kidnapped in Beirut on Jan. 8.

Three days later. Islamic Jihad renewed its threat: "After the pledge that we have made to the world that no Americans would remain on the soil of Lebanon, and after the ultimatum we have served on American citizens to leave Beirut, our answer to the indifferent response was the kidnapping of Mr. Jenco ... All Americans should leave Lebanon."

In reply, a State Department spokesman declared that the United States "is not going to be forced out of Lebanon." Islamic Jihad then answered that all five American hostages taken in the past months would be tried on charges of spying.

Islamic Jihad has repeatedly declared its goal to be complete extirpation of the American presence in Lebanon — commercial, education-al, journalistic and religious as well as governmental. This intention could hardly be stated more emphatically or pursued more directly, yet American observers hesitate to take Islamic Jihad at its word. The audacity of its

'American Embassy, please ...'

Americans are accustomed to enmity based on political differences. not to hatred of their culture. The belief persists that the attacks are connected to specific policy goals. That Islamic Jihad aims to root out American influence, not change U.S.

policy, remains unrecognized.
Ignoring Islamic Jihad's explicit
ambition fits a long tradition of paying inadequate attention to statements of intent that sound too strange to be plausible.

Adolf Hitler spelled out his inten-

considered too outlandish to be taken seriously. Ayatollah Ruhollah Khomeini spelled out his plans for an Islamic government in writing, but

very few took him at his word. Must the Islamic Jihad's vision of eliminating American influence be treated in similar fashion? That its aims do not fit familiar rubrics is no reason to discount them.

Americans must own up to the choice they face — withdraw or resist with every means at hand. If they decide to stay, they must be prepared

my, by violent means if necessary, at considerable cost in American lives. Should the price of staying be deemed too high, America should withdraw now, before more lives are lost. If standing firm be the choice, as the State Department seemed to indicate, then the threat posed by terrorist organizations must be countered.

### No, the Press in America Doesn't Run the Country

By James Reston

WASHINGTON — You could W get the idea listening to General Westmoreland vs. CBS or unfortunate word) are challenging General Sharon vs. Time magazine the power, policies and propaganthat public officials are now the da of government so much, but victims of a powerful and reckless communications industry. If you can buy that baloney, you will and the paradox of it is that the paradox of it is the paradox of it is that the paradox of it is that the paradox of it is that the paradox of it is that

swallow anything.
That reporters and editors are often insensitive or careless, and the endless, inevitable and necessary struggle between officials and reporters, the balance of power is power and policies.

now obviously running with the officials and not with the reporters. I cannot remember a time in the last 50 years in America when officials dominated the news as much as they do today. They determine the wording and timing of official information, with a keen eye on when to dramatize good news and

when to minimize bad news. If President Reagan feels uncomfortable with the questions of reporters at news conferences, he simply avoids them, as he did in the time between his nomination and his election. If he thinks reporters might embarrass his inva-sion of Grenada, he simply bars them. And the evidence is that

most of the American people think this is a dandy idea.

Franklin Roosevelt, the master of radio politics, did not care what the editorial writers or columnists thought about him or his policies, so long as he could make the news on the front pages and make his fireside chats to the people on Sun-

day evenings. He was not elected four times by accident. Ronald Reagan, the master of television politics, makes FDR look like an amateur. He can get a national television audience for his policies or opinions almost any time he likes, and his trusted aides are not far behind.

It is hard to get up these days and tune in on the morning televi-sion shows without seeing some cabinet or White House staff officer proclaiming the virtues of big-ger defense budgets, or minimizing the dangers of big deficits. And on Sunday mornings on the David Brinkley show, "Face the Nation" and "Meet the Press" (where there is now no more press) their ser-mons get more attention than all the preachers in the land, and are reported on the pages of the Monday morning papers.

Nobody can blame government for emphasizing its achievements and minimizing its blunders or failures. All institutions do that, including newspapers and networks, bishops, reporters and eduors. The interesting thing these days

papers and the networks are condemned for their pains by an ad-ministration that denounces the sometimes even reckless, in their oppressive power of government invasion of the privacy of ordinary citizens nobody would deny. But in viduals and non-government institutions, except when freedom is used to question the government's

> One thing is obvious. Conceding all the staggers and blunders of the newspapers and the networks, officials are certainly not denied the opportunity to state their own views. About 20 years ago the ma-jor newspapers of America decided that the tangles of foreign and domestic policy were too serious to be left to the papers' own commentators, and they opened up opinion pages to the views of officials or anybody else who could express a coherent contrary argument.

The press, radio and television in America have never been more open than today. With the development of photocomposition, the offset press, and public and cable television, and despite the failure of many big city evening papers, we are in the midst of the freest communications revolution since

the invention of movable type. The question is whether the power of the press or the power of government is the greater menace to the security of the people.

The view in this corner is that America needs them both, for it is clear these days that there is a fundamental dispute about what "se-curity" of the country really means. Some feel it needs more weapons, others fewer deficits.

These are fundamental issues

that need to be debated by a strong government and a strong press.
"I was thinking the other day," Mr. Reagan told a rally of his ap-pointees on Friday, "that in our first administration we made history — and in our second, we change history forever ... From here on in it's 'shake, rattle and roll.' "Well, forever is a long time, - and in our second, we can and the president's views were re-ported. But if we are going to "shake, rattle and roll," maybe we should do it together, instead of just taking his word for it.

Is this a self-serving argument for the media? You bet it is, but it is also an argument for the people - who don't much like the press but probably would not like what they got without it.

The New York Times.

### Communist China Is Still Communist

Communist Party lose its raison d'être but it would stand to lose control of a potentially divided country. No achievement has been so dear to the hearts of senior party leaders as the maintenance of territorial "unity" attained through decades of arduous revolutionary war and political mobi-

lization. These leaders have not forgotten the warlord era. The Stalinist state and party bureaucracy stands to lose the job of controlling a centrally planned and administered economy. Millions of bureaucrats and military officers

stand to lose their perks. A substantial segment of the popu lation has grown comfortable with the welfare state of the past 35 years and would prefer to continue "eating out of the big pot" rather than fend for itself in the marketplace. And millions of uneducated young people, inefficient workers and managers who lack entrepreneurial skills stand to lose from the current reforms.

All these groups are potentially strong inhibiting factors against the growth of "capitalism" in China.

In any case, decentrating a com-

mand economy is a difficult task, and the Chinese leadership has made clear that there are important limits

BEIJING — If China became "capitalist," not only would the Communist Party lose its raison

By David L. Shambaugh Thought" continues to be de rigueur in teaching and research in the humanities and social sciences. Many

alized and centrally administered, including energy, transportation, banking and the military complex.

It is true that significant "capitalist" policies have been introduced in various other sectors, but property still collectively owned. Production targets must still be met. China's 800' million peasants must still fulfill their output quotas before they can sell their surplus on the "free market."

Bonuses are handed out to factory workers, by and large, across the board or through favoritism rather than by the piece-rate system. Jobs are still predominantly assigned by the state. The vast entrenched bu-reaucracy still has the prerogative and the penchant to stille entrepreneurial initiative at lower levels.

In the ideological sphere, there is indeed widespread cynicism about orthodox Marxism-Leninism. Yet it remains the underpinning of intellec-tual and artistic life. I can testify that there has been no abandoning of Marxism in the university classroom.
"Marxism-Leninism-Mao Zedong

students may detest it, but they still to reform. Many key sectors of the must memorize the Marxist canons Chinese economy will remain nation- and theoretical interpretations, and their grades are given accordingly. Developing independent critical fac-

ulties is not encouraged or rewarded. The situation is even worse in the realm of the arts and literature, devarious other sectors, but property spite very recent proclamations to the and the "means of production" are contrary. Socialist realism may be waning in the fine arts, political themes no longer dominate opera call to let "a hundred flowers bloom" in literature, but all artists know well that they must create within the con-fines of building a "socialist spiritual civilization" and upholding the "four basic principles" - the socialist road. the people's democratic dictatorship. leadership by the party and Marx-

ism-Leninism-Mao Zedong Thought. All things considered, the news of communism's demise in China is premature, to say the least

#### LETTERS TO THE EDITOR

Hunger in Africa: The Farmer Needs Confidence spected and, above all, given a

Two commentaries in your Jan. 11 issue outline the problem of food production in Africa, reflecting the urgency of the present tragedy there.
In "A Crucial Second Step in
Fighting African Hunger," Jack
Shepherd applauds some of the agencies that for more than 20 years have struggled with the problem. But the fact is that all these efforts, the huge sums of money, the thought and the goodwill have simply not worked. The present situation is proof.

In "The Ebodaghe Formula: Ingenuity, Good Sense, Sweat," Christopher Matthews writes: "It is increasingly recognized that the key to solving Africa's food problem lies not with commercial farms or billion-dollar projects but in helping the small-holder to produce more food for himself and his community." And in this

recognition is our hope.

The small farmer is clearly the answer — as has also been proved in India. He must be listened to, re-

Disaster Is Nonpartisan

We will have to live with technical disasters like the one at Bhopal, along with natural calamities like cyclone earthquakes and droughts. All the victims need immediate relief. Could we not remove considerations of politics, multinationals' balance sheets, race and religion from relief work by having an international agency to

chance. As one Swedish expert in Africa explained, "The farmers say, "Why should I break my back building an irrigation system ... when next year I may be farming else-where?" And further, "Farmers have lived in fear that their farmland will be redistributed to other peasants or to farmer cooperatives." This is obviously no way to in-

rease food production. Nehru said it well: "Progress is giving a man who has a wooden plow the opportunity to get himself a metal plow." This means production, yes, but also self-respect — evidence that effort and initiative ("ingenuity, good sense, sweat") can be the solution of the tragedy that is rightly troubling the tragedy that is rightly troubling the ence of the world:

MILLICENT H. FENWICK, bassador of the United States. Mission to the UN Agencies

for Food and Agriculture.

deal with such disasters, backed by

an international disaster fund?

Regarding the optmon column "There Are Land Mines Under Ameri-ca's Big Banks" (Jan. 15):

Mortimer B. Zuckerman's column

is a valid analysis of the time bomb in America's banking structure. But all three of the measures he suggests require federal initiative and enforcement. Will an administration dedicated to less government control accept them? Probably not until the banking system verges on collapse. EDWARD PEIZER

Neither Devil Nor Angels

St. Anton, Austria.

As someone with long-standing ties to conservative Protestantism former associate editor of "Christianity Today" and co-founder with C. Everett Koop of the Christian Arts Council — I want to compliment you on your Jan. 16 report "Rightist An-gels on America's Shoulder" by Kathy Sawyer. It is clear and fair.

But there is an unfortunate error.
Some fundamentalists are "double separationists," not "devil separationists," as your printer's devil has you say. "Double separation" means holding oneself distinct not only from so-called "liberal Protestants but also from other conservatives who still associate with those liberals.

HAROLD O.J. BROWN. Klosters, Switzerland

The headline is unfortunate, since it implies that these people ("angels") somehow have an unquestionable knowledge of right and wrong. This is certainly a matter of debate.

DAVID BENJAMIN.

#### **EUROBONDS**

### Investors Rush to Snap Up **High-Yielding Securities**

By CARL GEWIRTZ

Insernational Herold Tribune - With a near record gap between short-term Eurodollar rates and longer-term bond-market rates something had to give —and last week it did, as investors began jumping into the bond market to grab high-yielding securities while they were still available.

The two forces fueling the run into the bond market were

expectations that short-term rates could continue to ease and that the gap between longer-term rates would have to decline, meaning long-term rates would have to fall faster than short-term

The gap last week between three-month Eurodollar rates and 10-year Eurobonds was a wide 315 basis points (3.15 Europond Yields percentage points). Salomon For Week Ended Jan. 23 U.S.S to term, Int'l Inst. .... Brothers economist Jeffrey Hanna said this was close to the record gap of 360 basis points set in September 1982. French Fr. medium term (Salomon began its Euro-Yen medium term, int'l inst. Yen is term, int'l inst. ECU short term market data in 1979). Since mid-1982, when the Federal

Reserve adopted a less mone-EUA long term \_\_\_\_\_ FLx ig term, int'l inst, \_\_\_ FLx medium term \_\_\_\_ tarist policy, the spread between short- and long-term rates has averaged just under 200 basis points, Mr. Hanna The gap can be closed by Market Turnover short-term rates rising or Total Dollar Equivalent Cedel 9,968.00 7,797.50 2,180.50 Eurogleor 13,912.50 12,698.40 1,214.10

long-term rates declining. And last week, following declines in the latest weekly money-supply figures and durable-goods orders, the popular view was that the long-term

rates would do the adjusting.

Technical analysts shared this view. Arnold P. Simkin, Merrill Lynch's former European economist who is now in business for himself under the name of Stratecon, noted that non-borrowed reserves of U.S. banks rose a sharp 8.8 percent in the first half of this month compared with the first half of December. He concludes that this jump in the banking system's liquidity must ultimately show up as lower interest rates.

NVESTORS needed no convincing. Bankers last week reported that Eurodollar time deposits coming up for renewal are not being reinvested in the money market but rather are being redeployed in the bond market to take advantage of the significantly higher returns.

In New York, however, some of the steem was out of the bond.

In New York, however, some of the steam ran out of the bond-market rally late Friday following a warning from the one Fed governor who opposed the last cut in the discount rate that the fight against inflation is not finished and that restraint in the future growth of the money supply will be needed . . . if the goal of price stability is to be realized."

The downdrift in New York prices may have been nothing more than normal profit-taking, especially because last week's rally there was much sharper than the gains experienced in the Eurobond market.

In any event, the price of Eurobonds launched earlier this month at what then appeared to be very aggressive terms were strongly bid up from their initial steep discounts.

In this environment Arizona Public Service and Gulf States Utilities, both carrying low-grade investment ratings, were each able to market \$75 million of seven-year notes. Arizona offered a coupon of 12½ percent, and Gulf States, a coupon of 13 percent, about half a point less than what they would have had to pay to raise funds in New York, but rich enough to attract buyers in Europe. Both ended the week at relatively modest discounts of

Even South Africa, whose paper is always difficult to sell in the dollar market, was able to raise \$75 million through its Electricity Supply Commission. Its six-year notes carried a coupon of 1214 percent, but they traded at a hefty discount of 1% percent. As the week ended and sentiment turned increasingly bullish,

Denmark returned to the market for \$100 million, paying a coupon of 10% percent for five-year money. The notes were offered at 99% but were quoted at a two-point discount. By contrast, Crédit Agricole and Signal Cos. had no problem placing seven-year notes, each for \$125 million. Triple-A rated Crédit Agricole paid a coupon of 11½ percent while Signal

Of particular interest was the poor performance of the bonds

targeted for sale in Japan - where, until recently, institutional investors have been willing to buy paper issued by Japanese companies almost regardless of coupon level as a means of (Continued on Page 11, Col. 5)

# **Phillips** Stock Call **Opposed**

#### Jacobs Attacks Refinance Plan

By Robert J. Cole New York Times Service NEW YORK — Irwin L. Jacobs the Mineapolis businessman, says that he has been buying stock in Phillips Petroleum Co. and will vote against its proposed refinanc-

ing plan.
Phillips, meanwhile, is understood to have raised \$1.5 billion from major U.S. insurance compa-nies to finance the plan.

The money would be used to buy back \$1 billion of company stock to help buoy the market price. Phillips on Friday called a meeting for Feb. 22 for shareholders to vote on the olan, under which employees would own a controlling interest in

9.91 % 10.05 % 9.28 % 10.00 %

the company.
Mr. Jacobs said Friday that he had not joined with anyone against the Oklahoma-based oil company.

He nevertheless is expected to receive support from such other dissident stockholders as Ivan Boesky, the Wall Street arbitrager, who is thought to have a significant block of Phillips stock, and Carl C. Icahn, a leading New York investor who may also have a big block of Phillips stock.

None, however, has accumulated as much as 5 percent of the company's 154 million shares or he would

be required by law to say so.
"The way I see it," one major oil analyst remarked, "is that these guys are going to try to lead a proxy fight to liquidate Phillips. Why take what Phillips is offering when they can get \$60" through liquidation? Mr. Jacobs said: "I have no

problem with the employees buy-ing control of this company. But the employees should either buy the whole company at a fair price or someone else should buy it.

Traders bid up the price of Phil-lips on the New York Stock Exchange to a closing \$48.88 a share Friday, up 88 cents, on a volume of nearly 3 million shares.

### Manila's Economic, Political Woes **Batter Once-Thriving Stock Market**

By Steve Lohr New York Times Service

MANILA - Last October, the local radio program carrying the daily trading session on the Manila Stock Exchange was finally pulled off the air. In better times, the program had been a continuous chatter of transactions being announced in the shorthand of company names

"But by last year it was mostly just long periods of silence," explained Ramon Gonzales, an executive at a big Manila brokerage

Reflecting the economic troubles and political uncertainty in the Philippines, the Manila stock market - composed of two exchanges, the Makati and the Manila, which trade the same issues - may well

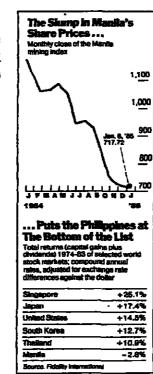

have been the worst-performing market in the world last year. "We stood at the bottom of the ladder in the region and maybe elsewhere, too," conceded Fred Hagedorn, president of the Manila

The sorry state of the local markets has stretched the vocabularies of local financial reporters. Journalistic clichés such as "lackluster performance" and "quiet trading" have given way to "moribund" and

Those who speak of a bear market are branded as optimists. "The bear story has ended," one analyst said. "Maybe the stock market will gasp its last breath in 1985."

The slide in share prices last year was chilling. The commercial-industrial index on the Makati exchange fell 41 percent in 1984, while the same gauge on the Manila exchange dropped 36 percent. But it is the level of trading, or lack of it, that most worries brokers

On a recent trading day, two dozen men lingered around the 50 wooden booths at one exchange. Most were talking casually to one another. Others were reading newspapers. Only two traders were on (Continued on Page 13, Col. 7)

# Reports Mixed From Panel on **OPEC Pricing**

GENEVA — Saudi Arabia's oil minister, Sheikh Ahmed Zaki Yamani, said Sunday that an OPEC committee had made progress to-ward a solution to the cartel's price disarray. However, other OPEC officials were less optimistic.

The seven-member panel, of which Sheikh Yamani is chairman, met Sunday in Geneva to prepare recommendations for Monday's emergency meeting of the 13 na-tions in the Organization of Petro-

leum Exporting Countries.
The cartel is trying to prevent prices from sinking further under the pressure of weak demand for oil and increasing competition from Britain and other non-OPEC exporters.

During a break in the talks, Sheikh Yamani told reporters, "We are discussing everything" that might be done to restore unity and discipline to OPEC's price structure. He added that progress was being made, but he declined to say what specific action was being con-

Tam David-West, the Nigerian oil minister, said, "Everything is going very well, very well." However, Mana Said al-Oteiba,

oil minister of the United Arab Emirates, said it would be "very difficult" for OPEC to agree this week on an effective realignment of prices. His pessimism was echoed by other ministers, who spoke on condition they not be identified.

Officials said Saturday that a separate OPEC panel had agreed to recommend to Monday's meeting that the cartel maintain its benchmark price of \$29 a barrel for Arabian light crude oil and stick to the

barrels a day it set Oct. 31. Sheikh Yamani's committee was charged with deciding how OPEC could realign the prices of its doz-ens of different grades of oil. A realignment might not include a change in the base price of \$29, but it would seek to restore balance to a badly disjointed pricing system.

A senior member of one delega tion said he saw little chance that OPEC would agree to a logical and effective realignment of its prices unless Saudi Arabia unexpectedly dropped its opposition to raising the price of its lower-quality oils. That could be an alternative to cutting the price of the higher-quality

Sheikh Yamani has been quoted in recent days as saying that Saudi Arabia would not accept an increase in the price of its Arabian heavy crude because it would mean an unjustified loss of sales.

Many of Saudi Arabia's partners in OPEC believe that the price of the lower- quality crudes must be raised to reflect growing demand for that grade of oil.

Last month, at its year-end meet-ing. OPEC announced an agree-ment to raise the price of those heavy oils by 50 cents a barrel, to raise medium grades by 25 cents and to cut extra-light oils by 25 cents. But Nigeria and Algeria re-

jected the arrangement.

Some analysts have said recently that they believe OPEC will be forced soon to reduce all its prices by at least \$1 a barrel. That would be only the second official reduction in the cartel's 25-year history. The first cut was from \$34 to the current \$29 in March 1983.

### W. German Rate Hike Seen as Not Slowing Dollar

Afterwards, Mr. Smith sat behind the wheel of a Saturn prototype at the GM Technical Center in nearby Warren, Michigan, for the benefit of the camera crews from back home, and told the press how lithing is high-tech base makes it the logical place to locate Saturn.

#### Soviet Output Of Crude Oil Fell Last Year

New York Times Service

MOSCOW - Soviet oil production in 1984 slipped back to 1982 levels, the Central Statisics Board reported.

The figures showed that 613 been extracted in 1984, 3 million tons less than in 1983 and considerably below the target of 624 million tons in the Soviet Union, the world's largest oil

The statistics were published Friday in Izvestia, the government newspaper, alongside a re-port on a Politburo meeting at which Soviet leaders demanded the "liquidation of the lag in extraction of oil and coal." Coal production dropped from 716 million tons in 1983 to 712 million tons last year.

According to Western experts, the Soviet Union has already pared its subsidized exports to its East European allies, and a continuing decline could cut Soviet foreign-exchange earnings. Oil accounts for 60 percent of Moscow's hard-currency income.

Natural gas production was 587 billion cubic meters (20.5 trillion cubic feet) last year, more than the target of 578 bil-lion and up from 536 billion in 1983, Izvestia reported.

#### The day after Mr. Thompson's visit, Governor James J. Blanchard scentives offered to GM by any saturn is expected to create the state." # Post Slight Gain in Yields

By Michael Quint New York Times Service NEW YORK — After falling sharply earlier in the week, yields

asury notes and bonds rose slightly Friday. Government-securities dealers attributed the slight rise in yields and drop in prices to a willingness of some speculators to take profits rather than to any change in the

outlook for interest rates.

#### U.S. CREDIT MARKETS

dealers expect the Treasury to announce early February auctions to-taling about \$17.75 billion, divided between issues due in three, 10 and

By late Friday, the Treasury's 114-percent bonds due in 2014 were offered at 104% to yield 11.18 percent, down from Thursday's close of 104 30/32. A week earlier, the Treasury's beliwether bond was offered with a yield of about 111/2

The 11% percent notes due in 1994 were offered at 10314, down 6/32, to yield 10.95 percent, and the 11-percent notes due in No-vember 1987 were offered at 102. down about 1/2-point, to yield 10.14

Elsewhere in the Treasury market, Lazard Frères began marketing \$1.3 billion of zero-coupon receipts, consisting of interest and principal payments from \$400 million of 11%-percent Treasury bonds due in 2004.

The so-called "early-bird receipts" will be replaced in May by

Treasury obligations.

Lazard did not publish any prices, but zero-coupon securities due in about five years were offered in the wholesale market at about \$58, or \$580 per \$1,000 face amount, to yield 11.10 percent, while 10-year issues were at \$33 to yield 11.35 percent, 15-year issues were \$19 to yield 11.35 percent, and 20-year issues were slightly over \$11 to yield 11.25 percent.

Investment bankers, who handled roughly \$2.2 billion of new corporate issues in the last week, said the recent decline in interest rates had caught the attention of corporate treasurers who wanted to refinance short-term borrowings or refund outstanding debt sold when interest rates were much higher.

The desire to refund high-inter est debt was the catalyst for last week's \$200-million issue of New England Telephone debentures vielding 12.17 percent and Mountain States Telephone's \$175 million of debentures yielding 12.30

New England Telephone is offering to buy its \$150 million of 1514percent debentures due 2018 at a price of \$1,175 per \$1,000 face while Mountain States is offering \$1,175 per \$1,000 for its \$200 mil-lion of 15%-percent debentures due in 2021 through Salomon Brothers. American Telephone & Tele-

graph Co. also announced plans to reduce its debt expense by retiring old, high-interest debt of the Pacific Telephone & Telegraph Co.

THE EUROPEAN COMMUNITY

### Delors to Discuss Economy With Unions, Business

By Steven J. Dryden International Herald Tribune

BRUSSELS - Jacques Delors, president of the European Commission, will meet union and business representatives this week in an attempt to identify common positions on what can be done to combat the community's economic The two groups are the Industri-

al Association of the European Community, which represents business and is known by its French acronym, UNICE, and the European Trade Union Confederation, which represents unions and is known as CES. Both groups gave Mr. Delors their economic proposals in separate meetings earlier this

At the initiative of Mr. Delors, representatives of the two groups will meet Thursday in Brussels with him, Peter Sutherland, the commissioner for competition policy and social affairs; Karl-Heinz Narjes, the industry commissioner, and Alois Pfeiffer, the commissioner for employment and economic af-

One aide to Mr. Delors said the meeting was a "risk," given the dis-agreements between the two groups on such questions as the extent of

But Mr. Delors believes the the statement said. meeting is necessary to demonstrate the community's desire to work with business and labor in revitalizing the European economy, the aide said.

Of Counterfeit Goods

The commission has drawn up a proposal to help community manufactures halt the growing interna-tional trade in counterfeit goods.

The proposal, which would ap-ply only to products from non-community nations, would allow bolders of trademarks to ask customs authorities to hold goods suspected of being counterfeit at com-munity borders for 10 days.

If during this time the goods were discovered to be counterfeit they would be "confiscated and disposed of," a commission statement said.

ing trade in counterfeit products, ides hurting the sales of genuine manufacturers, has also been found to hurt buyers.

"Examples have been found of

public investment to create jobs, reduction in working time and government regulation of business.

But Mr. Delegate helicages that have destroyed the crops they were meant to help and helicopter parts that failed in use,"

W. Correct Couriers Cot

The proposal has been sent to the Council of Ministers for consideration by trade oficials.

Bank Says Popularity Plan Aims to Bar Import Of ECU Is Increasing More evidence of the increasing

popularity of the European Currency Unit was revealed last week when officials of the European Investment Bank discussed its 1984 activities at a news conference in The European Investment Bank,

long-term finance, raised 550 million ECUs (\$385 million) in 1984 to support lending activities, up from 230 million ECUs in 1984, they

which is the community's bank for

"There is definitely a large de-mand for ECUs in many com-tries," said Ernst-Günther Bröder, president of the bank.

On Jan. 24, the bank issued a loan of 200 million ECUs on the French capital market. It was the first such issue on the French market and reflected a strong interest

#### W. German Couriers Get **Competition Guarantees**

The commission reached an regreement with West German postand telecommunications authorities earlier this month ensuring that private-courier companies will be allowed to compete freely on the express-mail market.

In its announcement of the agreement, the commission warned other members that an extension of their postal and telecommunica-tions monopolies could violate the community's rules on competition.

Authorities of the West German Bundespost had previously regarded their postal monopoly as extending to all Bundespost services. raising fears that the activities of private-courier services would be appressed as the government developed its own express-delivery service, the commission said.

Curtailment of the activities of the private companies "would have a particularly adverse effect" because the companies are "extreme-ly important for the growth and integration of the European economy," a commission statement said.

### Manila's Stock Market Is Hurt By Economic, Political Woes

the telephone and their conversa-

tions were not about trades. "Yes. the market is open now," confirmed Irving Ackerman, a broker, as he surveyed the scene.

A governor of the Makati Stock Exchange for the past two decades, Mr. Ackerman, 63, added: "I wish you could have seen this trading floor in the early and mid-1970s. The telephones were clanging so loud that I would have to shout for you to hear me. And there were times it just rained money here."

In 1984, the volume of shares traded on the Makati exchange was about one-tenth of the peak reached in 1976, and the value of the stock bought and sold was just \$77 million. On the Manila exchange, the value of shares traded was \$35 million, and the turnover was about one-thirtieth of the peak of eight years earlier.

In its year-end story, Manila's leading financial newspaper, Business Day, captured the nub of the problem in the headline: "Stock Market Mirrors Economy.

6 percent. Inflation averaged 50

percent. The prospects for this year are uncertain. The health of President Ferdinand E. Marcos appears shaky. Opposition to his government is growing, and a Communist insurgency is gaining strength.

However, there are signs of an economic improvement. These include the recent approval by the International Monetary Fund of a standby credit — an important step toward rescheduling the country's \$25.6-billion foreign debt.

But as part of the government's austerity plan for recovery, interest rates have been raised to mop up excess funds in circulation, thereby controlling inflation. But with interest rates on government bills and notes as high as 40 percent, people are even less inclined to invest in the stock market. Analysts agree that in the short

term, interest rates must come down if stocks are to regain any appeal. To get long-term improve-

East Germans Finish 1-2 in 4-Man Bobsled CERVINIA, Italy (UPI) — Bernhard Lehmann led East Germany to a 1-2 finish Sunday in the four-man event at the world bobsled championships, on a day marred

by two spectacular crashes, Lehmann, driving East Germany's first sled, clocked an aggregate time of 4 minutes, 14.06 seconds for four runs over two days on Cervinia's 1.5-kilometer (0.925-mile) Lac Bleu course. In second place was the second East German sled, driven by Dellef Richter, in 4:14:63. Switzerland I, piloted by Silvio Giobellina,

finished third in 4:14.81. The driver of Japan's No. 1 sled, Hiroshi Okachi, was treated for shock and facial cuts at a hospital, after his sled flipped out of the finishing curve. Brakeman Naomi Takewaki hurt his shoulder in the crash. Shortly afterward, West German crewmen Franza Neissner and Ewe Eisenreich were treated for knee injuries at the trackside clinic, after the first West German sled crashed at the same curve.

#### Brazil Fan's Bequest Was Overestimated

RIO DE JANEIRO (AP) — The lawyer for a deceased millionaire has deflated NHL record for games in which he the hopes of a small soccer club that had expected to receive as much as \$140 has scored three goals or more.

The lawyer, Luiz Fernando Arruda, said Friday that the estate of the millionaire, Luis da Silva, was far less than the \$300 million that the Bangu athletic club's lawyers had mentioned. "We think that, at the absolute maximum, it did not exceed 10 billion cruzeiros," or about \$3 million, Arruda said.

Da Silva, a lifelong fan of Bangu, a modest soccer club in an industrial suburb of Rio, willed about half of his fortune to the club. Arruda said the exact sum Bangu would get would be known after da Silva's holdings are inventoried. But in any case, he said, the Bangu figures were "unreal."

#### Valenzuela Among 97 Seeking Arbitration

NEW YORK (AP) - Los Angeles Dodgers pitcher Fernando Valenzuela, whose \$1-million contract in 1983 was the largest ever awarded by an arbitrator, headed a list of 97 players who have filed for salary arbitration.

The 97 players who had filed by Friday night's deadline compared with 80 in 1984. Among those joining Valenzuela in filing were Detroit Tigers outfielder Kirk Gibson, the Most Valuable Player in the American League playoffs, Leon Durham of the Chicago Cubs and Kent Hrbek of the Minnesota Twins.

#### Drug Use Said to Rise Among U.K. Athletes

LONDON (Reuters) — Drug use among British athletes is increasing because of most goals in a season in 1981-82, the lure of big prize money, The Sunday Times reported. It quoted Paul Dickenson, with scored 92 goals. a former hammer thrower, as saying that up to 60 percent of the country's

international athletes had used drugs.

"The inspiration behind the drug-taking is that athletics now means big money—but only for winners," the newspaper said. It identified steroids and amphetamines as the main drugs used by world-class British athletes.

#### **EQUAL DISTANCE**

By Brad Leithauser, 351 pp. \$17.95. Knopf. 201 East 50th Street, New York, N. Y.10022

Reviewed by Christopher Lehmann-Haupt

CLAVOR is Nature's way of telling you something isn't good for you," quips Greg Blaising to protagonist Danny Ott at a typically whimsical moment in Brad Leithauser's "Equal Distance." It is one of Greg's favorite maxims - others being "Nonexcessive excess is worse than moderation," "Whatever path you take, it feels like the wrong one" and "Fecklessness should be pursued feckful-

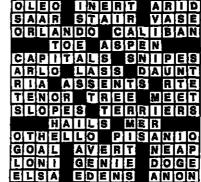

But Greg's flavor maxim fails miserably when applied to this remarkable first novel. For rarely does one come across a work of fiction so singular for the variety of pungent flavors it succeeds in conveying — the flavors of food, of drink, of travel, of nature, of friendship, of family, of youth, of love and most particularly of contemporary Kyoto where Danny Oit and his expatriate American friends spend most of the year that "Equal Distance" encompasses.

And not only is the book delicious to savor. but it also leaves you with the sense that you've been touched by a whole new generation of young Americans—the post-1960s generation—children disillusioned with the sins of the American past, yet bent on overcoming them with the force of their intelligence and ambi-

There is a rudimentary plot to "Equal Distance," the first work of fiction by a published poet ("Hundreds of Fireflies") and former law student who has already won every sort of award for his writing from a Guggenheim to a MacArthur Fellowship. Daniel Chapman Ott ("Ott is exactly it!") is taking a year off from his Harvard law studies to live in Kyoto, learn Japanese, assist a Japanese professor in his study of international law, complete a thesis on the nature of free will, and generally to improve himself.

But his straitlaced plans are derailed by loneliness, news of his parents' marital split, and the dissipative friendships of Greg Blaising, he of the comic maxims, and Carrie Pingree, an updated mixture of Lady Brett Ashley and Daisy Buchanan. For his sins and those of his compatriots, Danny eventually makes a pilgrimage to Hiroshima, though any excessive piety in this gesture is nicely balanced by the ruminations of Danny's father. Alec Ott, who

> Solution to Friday's Puzzle MUTES LAVA INERT ARID STAIR VASE

gets the last word in the book, recalling the bittersweetness of his service in World War II's Pacific campaign.

----

Several themes are also explored, chief among them the legitimacy of international law, whose absolute principles Danny's unbending Japanese mentor strives to uncover, while Danny, feckfully pursuing fecklessness, seems to arrive at the answers contained in the volume of Thomas Hobbes's "Leviathan" that

he uses mainly as a stash for marijuana. Still, it is the flavors of "Equal Distance" that make it such a pleasure to read — the flavors of its supple, intelligent prose, of its artfully individuated characters, of its charming talk and of its endlessly inventive comic detail. I for one was charmed by the mindgames that Danny Ott plays with himself: he wonders at what point he would notice the change if the Kamo River were to widen by five feet a day, or what the world would be like if all its men were Danny Otts.

I was amused by the way Greg Blaising talks, especially when under the influence. "I teach I run. I walk around. I eat fruit," he explains when Danny asks him how he spends his time in Kyoto. "I drink too much. I read. I go to bars and try, for the most part with extreme fecklessness, but now and then with heartening

success, to pick up Japanese women."
I laughed out loud at Greg's plan to "take some very famous, swanky restaurant, in Manhattan or Georgetown, say, prestigious as hell, the kind of place where they set out all sorts of fancy bread and stuff nobody touches, and down below, in the basement, you open a restaurant where you peddle the leftovers." "Greg's Good Used Food," he'd call it, "Serv-ing Only What's Still Basically Fit to Eat." Or the scene in which Danny and Carrie lose a coin in a soda machine they discover in a Buddhist temple, and approach a wizened

priest for help.
"You want Fanta Orange?" the priest asked in English. The brand name, particularly, sounded incongruous on his lips. 'Coca-Cola,' Danny corrected guiltily. 'Or anything. Please.'
In the next moment — as quietly and beautifully comic as any in Danny's life - this ancient priest in the apricot robe dealt the machine a savage kick with his wooden clog, pressed the Coke button, turned as the can fell with a responsive clang, tranquilly nodded,

clopped away."
This is a perfect epiphany of contemporary
Japan, but then everything upon which Leithauser casts his antic eye seems to transform itself into its essence, be it comic or pathetic, ugly or beautiful. His appente for the world appears to be insatiable, and his capacity to make it into language entirely without limit.
"It was an absolutely immense stroke of good fortune on your part to run into me," Greg says to Danny early in their friendship, only half kidding himself. Leithauser could say the same thing to his readers, but in all sincerity. I look forward immensely to the next encounter.

By Alan Truscort

ON the diagramed deal both teams bid ambitiously to six no-trump. In the auction shown, North should have been content to bid a natural four no-trump at his second turn leaving the last word to South. His two-club bid was a check-back, and four diamonds was a substitute for Roman key-card Blackwood. The reply showed three key cards

plus the trump queen. When a club was led to dummy's king, South recognized that he would need some good luck in both red suits. He correctly decided that the hearts

could wait and boldly led a diamond toward the king. This was a success as far as it went, with the ace in the East hand. but the bad break in hearts was going to shipwreck the slam, barring some double dummy

However, East came to the rescue by putting up the diamond ace, this might have been right in other circumstances, but it was quite wrong here. South subsequently cashed all his black-suit winners, and East could not stand the pressure in the red suit. The slam was made because East had arranged to squeeze him-

NEW YORK — Carl Lewis won and was booed because he took only four of his six long jumps. Diane Dixon won, and the announcement of her victory was booed because a breakdown in the automatic timer cost her an American indoor record. Mary Decker was cheered and booed before the women's mile, then drew only cheers after she won.

But the greatest cheers Friday night at the 78th annual Wanamaker Millrose Games at Madison Square Garden greeted Eamonn Coghlan's victory in the Wanamaker Mile. His time of 3 minutes, 53.82 seconds was the second fastest in Millrose history, bettered only by his 3:53.0 in 1981.

This was Coghlan's sixth victory in six attempts in this blue-ribbon race, equalling the record of Glenn Cunningham, who won the Wanamaker Mile six times between 1933

With two and a half laps remaining in the 11-lap race, Coghlan eased into third place. With a lap and a half left, he shifted gears, barreled by Sydney Marce and Ray Flynn, and sprinted home ahead of

Flynn, Fifteen minutes later, Decker won the women's mile for the fourth time in six years. She led from the start, ran by herself and won by 50 yards from Wendy Sly of Britain, the Olympic silver medalist at 3,000 meters. Decker's time of 4:22.01 was the third fastest in indoor history, and she now owns the

six fastest times indoors. Among the 800 athletes participating were 86 who competed last summer in the Los Angeles Olympics, including 15 gold medalists.

The most prolific winner at Los

Angeles was Lewis, who took four gold medals. The 23-year-old was roundly boosed in the Olympics when he took only two jumps in the long-jump final and passed his last four attempts. He said he felt a hamstring muscle tighten, and he did not want to risk an injury when he still had two gold medals to win Here. Lewis took four jumps. The first was a foul. ### The New Takeover Lingo

By William Safire WASHINGTON — The com-bination of bust-up takeover threats with greenmail has become a national scandal," writes Martin Lipton a lawyer, in The New York Law Journal. He adds, ominously, The junk-bond bust-up takeover is replacing the two-tier bootstrap

bust-up takeover."
"National scandal" is the only phrase I recognize in that burst of tycoonspeak. The new vocabulary of our business," the investment banker Felix G. Rohatyn has written, reflects a go-go atmosphere in which "two-tier tender offers, Pac-Man and poison-pill defenses. crown-jewel options, greenmail, golden parachutes, self-tenders all have become part of our everyday business.

Let us consider the individual words and phrases. When Brian Fernandez of Normura Securities is quoted in Newsweek as saying, "I'm sure ITT has a mine field of poison pills and shark repellent to keep people away," what does he

Shark repellent is the action taken by a company's board to shoo away raiders - the "sharks" circling the company and hoping to chew it up.

"One way to repel sharks is to stagger the board of directors," reports Fred R. Bleakley of The New York Times. "Instead of having the terms expire for all the board members at the same time, making a takeover easier, the staggering might mean that only one member's term expires at any given time," which might try a shark's patience. Another repellent is a fair-price amendment to the company's bylaws, preventing the shark from offering different prices on bids to different stockholders for their shares. Yet another is the crown-jewel option, selling off the most profitable segment of the company; this comes from the figurative use of "the jewel in the crown," now the title of a television series having nothing to do with the

world of big business.

My favorite repellent is the paison pill, taken from the world of espionage, in which the agent is supposed to bite a pellet of cyanide rather than permit torture after capture. To make a stock less attractive to sharks, a new class of stock may be issued: This is "a

preferred stock or warrant." Arthur Liman, a lawyer, informs me, "that becomes valuable only if another company acquires control. Because it becomes valuable to the target, it becomes costly to the buyer: When the buyer takes the bite, to follow the metaphor, he has to swallow the poison pill."

A junk bond is a high-yield, high-risk security specially designed to finance a takeover; this is supposed to enable the issuer of the bond to get enough bank financing to offer stockholders cash for all the stock in the company. "Following the takeover," writes Lipton, "the target is busted up to retire part of the takeover financing. Plants are closed, assets are sold, employees are thrown out of work and pension plans are terminated."

In extremis, a corporate survivor can try greenmail. First the shark swims around the company, showing its wicked fin and making menacing splashes; the shark keeps buying stock, but not enough to take over. Then the shark offers the frightened directors on the life raft a deal: Use company assets to buy in the shark-held stock at a premium, higher than the market price. Big profit for shark, safe jobs for management, and only the other stockholders get hurt.

'Greenmail is patterned on blackmail, with the green representing greenbacks," reports Sol Steinmetz, a lexicographer, at Barnhart Books. "It may have been inspired by the earlier graymail." That is a threat by a defense attorney to force the government to drop an espionage case by demanding the exposure of secrets.

I am not going into two-tier tender offers of Pac-Man defenses because it is not my intent to steal students from the Harvard Graduate School of Business, but the golden parachute deserves etymological examination. This agreement to pay an executive his salary and benefits, even if the company is taken over by somebody who wants to heave him into shark-infested waters, is based on golden handcuffs, coined in 1976 to mean "incentives offered executives to keep them from moving to other jobs. In turn, this was based on the British golden handshake, a 1960 term for a whopping sum given as severance pay.

New York Times Service

# A Space-Age Building

By Benjamin Forgey

Washington Post Service
WASHINGTON — The new headquarters for Intelsat, the international telecommunications satellite consortium, is without question the most provocative building ever to wind its way up a Washington hill.

Consisting of nine octagonal "pods" sheathed in glass and aluminum, and five extraordinary space-frame atria, the \$51-million building at the southwest corner of Connecticut Avenue and Van Ness Street NW commands attention. Although not quite finished -- computers are going in now, with office workers to follow this spring - the Intelsat building has become an object of intense dislike, or affection.

Intelsat is not a masterpiece, but it is in many ways an admira-ble and even a likable structure, and its complexities and ironies are worth careful examination. The architect is John Andrews,

an Australian whose international practice has included any number of very large, programmatically complex and visually impressive Modernist projects: skyscrapers and horizontal office buildings. multiunit residential quarters, prestigious educational buildings

and entire colleges. Andrews's company was chosen from six leading firms invited to submit proposals to a competition, Intelsat, in other words, was from the beginning conceived as a major architectural event comparable. say, to the Pompidou Center in Paris. The client and jury clearly wanted a building with impact. and they got one. The nature of this impact will be debated in Washington for years to come, and one's position in the debate will depend on responses to four interralated issues: the way the building responds to its site and the city around it, its style, its energy efficiency, and its interior

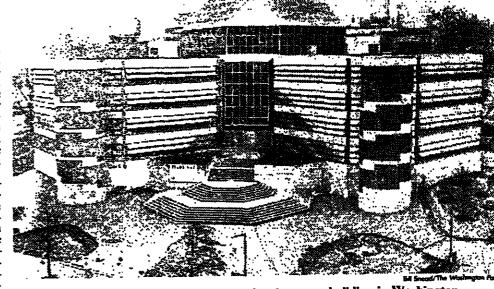

The building's interaction with the city is by far its weakest link. It is a jewel, a dazzling necklace in a green setting. It looks, in fact, as if it were a glittering piece of the 21st century designed for an iso-lated hill in the far-out suburbs of Anywhere, U.S.A., and placed, by celestial error or mere bureaucratic foul-up, at the corner of Connecticut and Van Ness.

If the immodesty of its overall image is inappropriate to the location - Connecticut Avenue from the edge of downtown to the Van

Ness intersection is the city's most urbane residential boulevard. lined with fine masonry apartment buildings - the Intelsat building is an affront to average pedestrians. This is because for reasons best known to Intelsat directors, the main entrance is on the wrong side of the building. that is to say up the hill, facing the new embassies and the new park on International Drive.

The building does meet the avenue corner with a certain emphalic finesse. A glass wall hangs like a sign between two massive cylindrical wings and above quite 3 grand flowing staircase, but the staircase is — how shall I say." — misleading. The only people aispaces and working environlowed entry here will need security clearance: casual visitors interested in Intelsat's by no means uninteresting business will have to trudge around to the back.

There are certain redeeming features, the major one being a park (with daytime access) that will open up underneath a towering stand of oaks at the corner of Connecticut Avenue and Tilden Street. In addition, a number of shops tucked away to the side of the avenue entrance will make the building seem more a part of the city. But basically, from the pe-

Exterior view of Intelsat's new headquarters building in Washington.

building is like a tantalizing apparition: Look, but do not touch. In this respect the comparison

to the Pompidou Center is apt and most unfortunate. The Pompidou Center, a huge, playful bauble in-serted in an old quarter of Paris, is, definitively, a noncontextual building but whatever one thinks of all of that colorful exposed plumbing it does attract a large and enthusiastic public to enjoy and use the building. Intelsat, by contrast, is a private preserve.

What, then, is likable about the Intelsat building? Andrews and his associates set out to design and build an energy-efficient jewel, and they did. The plan is to wash it with light at night - perhaps not a terribly energy-conscious thing to do, but aesthetically pardonable and more than justified by the tremendous energy savings predicted for the building.

The issue of the style is not an easy one to resolve. What building in Washington, except the Smithsonian Castle, has a more active, picturesque profile? What Queen Anne house has more handsome turrets or bays than Intelsat's cylindrical, nearly free-standing stairwells? What rambling Victorian-era mansion has a more inmany-sided glass roofs of Intel-

destrian point of view, the Intelsat cal quotations. But, for whatever combination of aesthetic and problem-solving reasons, the ar-chitect managed to make a building that is quite appealing in a conventional, non-Modernist

> In March, Andrews will deliver the keynote address to a Los Angeles conference on design and technology sponsored by the American Institute of Architects. His topic will be "A New Generation of 'Smart Buildings,' " and Intelsat is likely to be Exhibit A. It was designed, through and through, with passive energy saving in mind, and from floor to ceiling the operation will be monitored and controlled by computers. (This is what makes it a smart" building.)

The building's siting and its basic form. for instance, were determined mainly by energy considerations. It is on the hill to take advantage of sunlight and wind, and the interlocking octagonal forms of the office pods and the atria derived from the desire to provide as many offices as possible with natural light. The reflective sun screens attached to the façades are designed to allow light in and to keep heat out, when teresting set of gables than the necessary. The vast duct systems running throughout the building sat's atria? I don't mean to suggest are distributors of air treated by that Intelsat is a post-Modernist state-of-the-art energy recovery enterprise full of allusive historistates. (Even the heat generated

by the operation of the toilets can be recovered for use elsewhere.) In these and many other re-

spects, Intelsat is an engineering feat. If all works out as planned, more than 57 percent of the energy to light, heat and cool the structure will come from natural sources.

Another facet of the design -Andrews probably would call it a byproduct of the solutions to the energy puzzle - is the quality of the interior spaces. The atria, especially those with cantilevered concrete stairwells in the center. are beautiful, quite human in scale and not junked up with a lot of Portmanesque fancy work.

Intelsat should be a good building to work in. Exterior and interior views are plentiful, and the building is, among other things, extremely walkable. (There are but two elevator banks.) Just getting from here to there in this building promises to be a fascinating experience.

The strong public reactions to the building tode well. They re-mind me of the furor that greeted Alfred B. Mullett's State, War and Navy building (now the Executive Office Building), which Henry Adams called an "architectural infant asylum" and which most of us today would fight to preserve. I can imagine, 50 years from now, fighting to save the Intelsat build-

The atrium of the "smart building," which is designed to save energy.
